### Ralph Johnson, Instructor

Ralph is an American Welding Society certified welding inspector and an API 653 certified tank inspector and has a Master's degree in teaching welding from Oklahoma State University.

He has extensive experience in welding, metallurgy, quality assurance, welding & pipe mill inspection, tanks, nondestructive testing, ISO 9000 and instruction in these topics. His work has taken him to forty-five states and twenty-five foreign countries.

Ralph has worked for numerous companies in the industry and presently owns ASSOCIATES Consulting, Construction & Inspection Company. He is a member of the American Welding Society, Tulsa Section and other organizations in this field.

### Why should I become AWS/CWI certified?

CWI certification is a rewarding career that involves great responsibility and remarkable skill demonstration. Welding inspectors are responsible for analyzing and evaluating welding jobs to ensure measurements are exact and proper welding codes and safety standards have been followed.

### Why should I take this prep course?

- AWS/CWI certification is widely recognized.
- Companies rely on this certification to ensure the highest level of quality workmanship.
- Provides career advancement opportunities.
- Career opportunities in industries such as power generation & power stations, petrochemical, manufacturing, oil & gas, construction and others.
